

WAX RECOMMENDATION

McCall Remastered

Jug Mountain Ranch, Lake Fork, ID

Saturday, January 23

9 A.M.

15K/30K, Skate

Interval start

5K lap

<https://www.mccallnordic.com/racing/remastered/>

Forecast/Conditions: Several dustings of new snow throughout the week covering a firm and transformed base. Some short sections of the course that were previously ungroomed may soften up with skier traffic. Friday night low of 12, Saturday high of 27, 16 at start and 50 percent cloud cover.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com
