

# WAX RECOMMENDATION

## Bring Back Biathlon

Jug Mountain Ranch, McCall, ID

Saturday, February 27

10 A.M. to 2 P.M. practice, 3 P.M. race

5K, Skate

Interval start

3 laps

[https://www.mccallnordic.com/?page\\_id=2223](https://www.mccallnordic.com/?page_id=2223)

Forecast/Conditions: New snow throughout Friday night with a Friday night low of 14. Saturday has a 50 percent chance of snow with a temperature of 26 at the 3 P.M. start. Expect a soft, skied-in track on new snow.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply an additional layer of BP Blue Hot Wax, scrape and brush.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
